## PERSONAL PROJECTS

### Social Media (04/2023 - 05/2023)

- **User Actions:** Implemented user signup, login, post uploading, follow/unfollow, profile updating, and logout functionalities.
- **Technology Stack:** Utilized React.js, Node.js, Express.js, and MongoDB for full-stack development. Employed Material UI, Bootstrap 4, and JWT Token for enhanced user experience and security.
- **Social Interaction:** Designed features for users to connect through follows and post engagement, fostering a vibrant community.
- **Infrastructure Management:** Utilized Route 53 for domain management, ensuring smooth website accessibility and navigation.

### Mini-projects (03/2023 - 04/2023)

- Netflix Clone using React.js and API integration
- A To-Do list by using React.js

### E-commerce (12/2022 - 01/2023)

- **User-Centric Ecommerce:** Created a user-friendly platform enabling seamless browsing and purchase of fresh fruits and vegetables.
- **Enhanced Security:** Implemented OTP login and secure wallet payment options, ensuring trust and secure transactions.
- **Admin Efficiency:** Developed a fully customized admin panel for effective management of offers, coupons, categories, orders, and sales reporting.
- **Robust Technology Stack:** Leveraged Node.js, Express.js, MongoDB, and AWS services including EC2 and Route 53. Integrated technologies like JWT Token, Razorpay, and Twilio for a comprehensive and secure solution.
